

Developed in a collaborative effort with Wilcom International, the industry's top embroidery software developer, Janome's Digitizer MBX software combines easy-to-use functionality with a powerful software engine to give you the freedom to express yourself. From editing individual stitches to layouts of large, multi-hoop designs and full stitch-out simulations, Digitizer can handle it all with ease. Whether you are new to digitizing or a seasoned professional, enter the future of embroidery with the Digitizer series of software from Janome. The most exciting feature of the newest version of software, V4.5, is the option for freehand embroidery using a tablet.
